

Public Exhibition

Britaniacrest Recycling Ltd will be submitting a planning application this winter to develop a Recycling Recovery and Renewable Energy Facility (3Rs) at the site of the former

Wealden Brickworks, off Langhurstwood Road, RH12 4QD.

Whilst there has been substantial investment in waste processing facilities across the country, few are available to businesses to ensure that their waste is properly treated to avoid landfill. There is a real shortage of such facilities, especially as there is over twice as much business waste as household waste.

This facility will safely process waste and materials, such as metals, plastics and rubble, which will be sorted and segregated to recover their value for onward recycling using the latest sorting technology. The residual material will be used to produce energy using well established and proven thermal treatment technology. Electricity will be exported to the grid, enough to power over 42,000 homes. All these activities will provide a sustainable alternative to primary materials and fossil fuels.

Britaniacrest Recycling will be holding a public exhibition for local people to find out more and express their views on the plans proposed for the site.

The exhibition will be held at Roffey Millennium Hall, Crawley Road, Horsham, West Sussex, RH12 4DT on:

Friday 7th October from 5pm – 7 pm
Saturday 8th October from 10am – 1pm

Staff will be on hand at all times to welcome residents and answer any questions.
